PAPER-LESS, LLC TO DEMONSTRATE WORLD-CLASS MES SUITE AT INFORUM 2007

The Infor XA MES Suite bridges the gap between lean and ERP

ATLANTA – August 24, 2007 – Paper-Less, LLC, a leading software developer specializing in world-class shop floor reporting technology, today announced it will exhibit and demonstrate its solutions at Inforum 2007, Infor’s annual user conference being held September 9-12, at Las Vegas’ Sands Expo and Convention Center. The company will showcase the latest version of its solution, Infor XA MES Suite, at the Solutions Expo, Booth # 502.

“What makes our participation at Inforum 2007 so exciting is the opportunity to directly interact with a large audience seeking a world-class shop floor solution that delivers visibility and real business value,” said John Van Kempen, President. “We have designed and built the MES Suite to be supportive of world-class manufacturers whose requirements change as they deploy lean manufacturing techniques throughout their manufacturing environment”

The Infor XA MES Suite provides enterprise-wide access to real-time manufacturing information. Infor customers currently implementing Lean manufacturing practices with the additional requirements for labor tracking and quality reporting can now benefit from the functionality specifically designed for XA.

“Infor LEAP is the next generation of MES tools specifically designed to support your lean initiatives on the shop floor,” stated Phil Joseph, XA Product Manager for Infor.

This set of MES applications allows for the co-existence and simultaneous scheduling of Kanban and traditional manufacturing orders throughout the facility, and the continuous quality reporting and monitoring required for assuring that processes, not just product, adhere to the tightest of manufacturing specifications.

“The MES Suite is a comprehensive set of tools that increases the efficiency and quality of shop floor communications and the manufacturing process,” said Mike Frichol, VP global

industry and product marketing for Infor. “There is a substantial need in the market for a tightly integrated MES solution that provides timely and accurate production and quality information to enable sound business decision making. The XA MES Suite provides the tools powerful enough to impact the flow of information from order entry to final delivery of the finished good.”

“Paper-Less is a valued Infor partner that helps us offer industry-leading technologies that ensure our customers’ continued success and growth,” said Scott Williams, senior director of global alliance and partner management, Infor. “Inforum 2007 provides a world-class platform for our partners and customers to share ideas and learn more about the global Infor community.”
